CAN-AM WINDSHIELDS

DESIGNED FOR YOUR STYLE & CHARACTER

Integrated into the design of our other cab components and made to seamlessly fit your Can-Am, our windshields can be added or removed easily as the conditions and your needs change.

ENGINEERED FOR YOUR VISION

Like all other aspects of a Can-Am, our windshields are rigorously tested for rigidity and durability in conditions that far exceed normal riding. Why? So you're able to stay in the action and operate in severe conditions even longer. With a base of premium polycarbonate and a Quantum coating to ensure a long life, the difference is clear.

BUILT FOR YOUR VEHICLE

At Can-Am, vehicles and accessories are developed together to ensure both fit, look, and perform as they should. Development often leads to innovations like the Profiled Cage, which improves the fitment and installation of accessories—the windshield, for instance, perfectly fits into a groove built into the cage and is fastened with integrated centre latches. Go from the factory-equipped to seeing through a flawless-fit windshield without breaking a sweat.

NEW POWERFLIP WINDSHIELD

- The PowerFlip Windshield is equipped with electric pistons that allow the rider to adjust the windshield opening at the touch of a button.
- Windshield is made of hardcoated polycarbonate with a rubber seal contour and a tinted top section.

CAN-AM BUMPERS

DESIGNED FOR YOUR STYLE & ADVENTURE

Strength is nothing without the character to handle it—and our bumpers are proof. Designed to seamlessly integrate with the style, fit, finish, and capability of your Can-Am, our bumpers are also compatible with other accessories (like Front Corner Protectors and auxiliary lighting) that can be removed or added as needed.

ENGINEERED FOR YOUR SAFETY

With our reputation for reliable performance, we've tested our bumpers for uniformity in rust resistance and in impact protection. All our bumpers are e-coated, with the top coat bumpers treated for inside and outside corrosion protection. Look and you'll see the competition is top-coat-only.

BUILT FOR YOUR VEHICLE

We believe accessories must influence vehicle development from sketch to production. Can-Am bumpers combine design and function together perfectly to protect your vehicle, and look great from our test lab to your rides. It's an easy installation and there are no modifications needed—mounting points were developed together with the vehicle.

CHOOSING THE RIGHT DRIVE BELT CAN IMPACT POWER & PERFORMANCE

WHAT MAKES CAN-AM BELTS STAND OUT?

One essential material stands among our drive belt components: **PBO Fiber**.

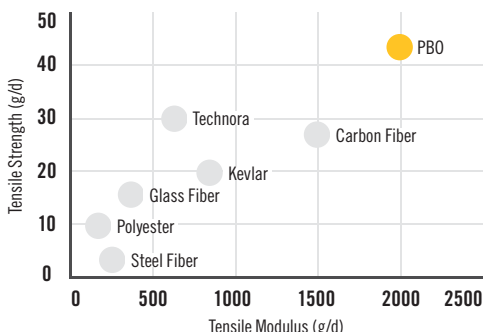

PBO Fiber is the next generation super fiber with excellent thermal stability, great abrasion resistance, and moreover, almost twice the strength and modulus of Aramid fiber.

- > We partner with the best manufacturers in the powersports industry to offer you **unique drive belts** with consistent quality.
- > The **100% cutting-edge PBO high-tensile strength polymer fiber** construction offers high-temperature robustness and prolonged durability.
- > Our engineering teams have perfectly integrated and tested each drive belt to **provide quick throttle response, powerful acceleration, top speed and consistent shifting performance**.
- > We aim at delivering the highest levels of performance and longevity based on **your vehicle's specific end-use and calibration**.

CAN-AM BELT CONSTRUCTION VS. COMPETITORS

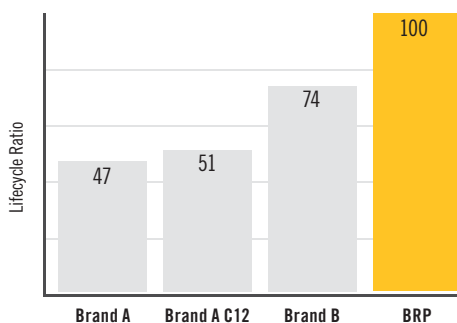

MODULUS & TENSILE STRENGTH

Based on Dynamometer testing, PBO surpasses Kevlar and Carbon Fiber materials in every way.

DURABILITY COMPARISON
